

Read the material on pages 1-3.

The observation record names Station Cedar.

Observation 1: the instruments remained stable.

Observation 2: the instruments remained stable.

Observation 3: the instruments remained stable.

Observation 4: the instruments remained stable.

Observation 5: the instruments remained stable.

Observation 6: the instruments remained stable.

Observation 7: the instruments remained stable.

Observation 8: the instruments remained stable.

Observation 9: the instruments remained stable.

Observation 10: the instruments remained stable.

Observation 11: the instruments remained stable.

Observation 12: the instruments remained stable.

Observation 13: the instruments remained stable.

Observation 14: the instruments remained stable.

Observation 15: the instruments remained stable.

Observation 16: the instruments remained stable.

Observation 17: the instruments remained stable.

Observation 18: the instruments remained stable.

Observation 19: the instruments remained stable.

Observation 20: the instruments remained stable.

Observation 21: the instruments remained stable.

Observation 22: the instruments remained stable.

Observation 23: the instruments remained stable.

Observation 24: the instruments remained stable.

Material continued.

Observation 25: temperature readings were unchanged.
Observation 26: temperature readings were unchanged.
Observation 27: temperature readings were unchanged.
Observation 28: temperature readings were unchanged.
Observation 29: temperature readings were unchanged.
Observation 30: temperature readings were unchanged.
Observation 31: temperature readings were unchanged.
Observation 32: temperature readings were unchanged.
Observation 33: temperature readings were unchanged.
Observation 34: temperature readings were unchanged.
Observation 35: temperature readings were unchanged.
Observation 36: temperature readings were unchanged.
Observation 37: temperature readings were unchanged.
Observation 38: temperature readings were unchanged.
Observation 39: temperature readings were unchanged.
Observation 40: temperature readings were unchanged.
Observation 41: temperature readings were unchanged.
Observation 42: temperature readings were unchanged.
Observation 43: temperature readings were unchanged.
Observation 44: temperature readings were unchanged.
Observation 45: temperature readings were unchanged.
Observation 46: temperature readings were unchanged.
Observation 47: temperature readings were unchanged.
Observation 48: temperature readings were unchanged.
Observation 49: temperature readings were unchanged.
Observation 50: temperature readings were unchanged.

Material continued.

Observation 51: the record was checked again.

Observation 52: the record was checked again.

Observation 53: the record was checked again.

Observation 54: the record was checked again.

Observation 55: the record was checked again.

Observation 56: the record was checked again.

Observation 57: the record was checked again.

Observation 58: the record was checked again.

Observation 59: the record was checked again.

Observation 60: the record was checked again.

Observation 61: the record was checked again.

Observation 62: the record was checked again.

Observation 63: the record was checked again.

Observation 64: the record was checked again.

Observation 65: the record was checked again.

Observation 66: the record was checked again.

Observation 67: the record was checked again.

Observation 68: the record was checked again.

Observation 69: the record was checked again.

Observation 70: the record was checked again.

Observation 71: the record was checked again.

Observation 72: the record was checked again.

1. Which station is named in the observation record?

Answer key:

1. Station Cedar
